LAUNCH AUSCAN 3

The new AUSCAN 3 is a dynamic tool, with impressive vehicle coverage and full system diagnosis, it's the must have tool for every workshop.

FEATURES:

- Scans 125+ brands, each vehicle fully covered.
- Re-programme modules, code injectors and keys, fast live data and accurate graphing.
- Print/email reports directly from the AUSCAN 3 to your customer.
- Code troubleshoot and guides accessible directly from the scan tool.
- Easy 1 click updates (24 mths included).
- AECS technical support database directly from the tool (optional).
- 12-months AECS technical support (optional).

SPECIAL FUNCTIONS:

AUSCAN 3 has a huge ability. Includes special functions such as:

- Immobilizer/key coding
- Door control re-learn
- Transmission re-learn
- Electronic throttle relearn
- ETACS adapt
- Actuator tests

Resets include:

- DPF
- Brakes
- Brake bleed
- Injectors
- SAS
- TPMS
- Battery
- Transmission (and many more).
- Oil
- Throttle relearn
- Immobiliser

All day battery - 7000mAh
 Huge storage - 32G+32G SD
 Large screen - 10.1" LCD
 Dust tight - IP65
 OS - Android 9

OBD Connector
 Bluetooth + Extension

Full range of connectors.
 Connect to older and the latest vehicles, including 138 brands.

Auscan 3 has ADAS installed ready for when you want to expand into ADAS calibration.

AUSCAN 3

WHATS IN THE BOX

CONNECTORS

Full range of connectors. Connect to older and the latest vehicles, including 125+ brands.

OBD CONNECTOR

Bluetooth + Extension

AUSCAN 3

All day battery - 7000mAh
Huge storage - 32G+32G SD
Large screen - 10.1" LCD
Dust tight - IP65
OS - Android 9

TOUGH CASE

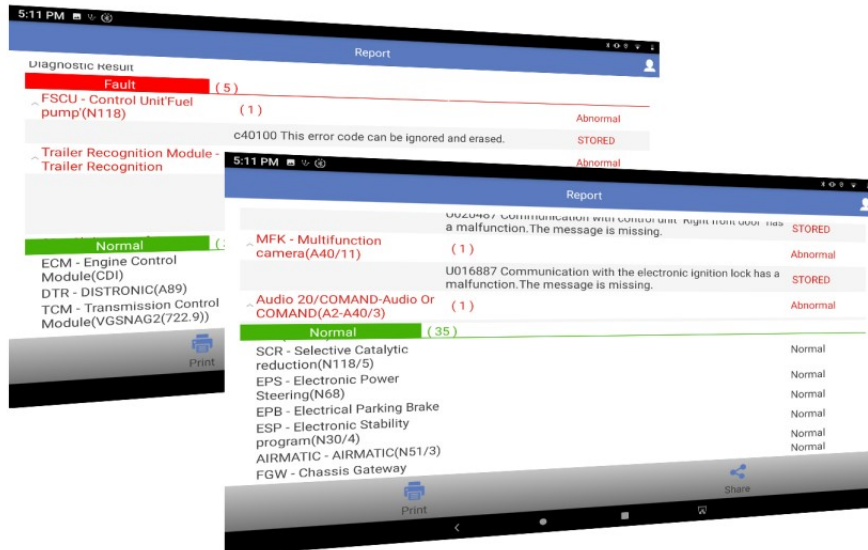

HISTORY

Scroll through your diagnostic history by date to access the vehicles that you have scanned from the history menu. See which codes were recorded before repair in the automatically generated report with letterhead, to make it a breeze to show your customer 'before' and 'after' repair. Quickly access the vehicle's ECU with one click.

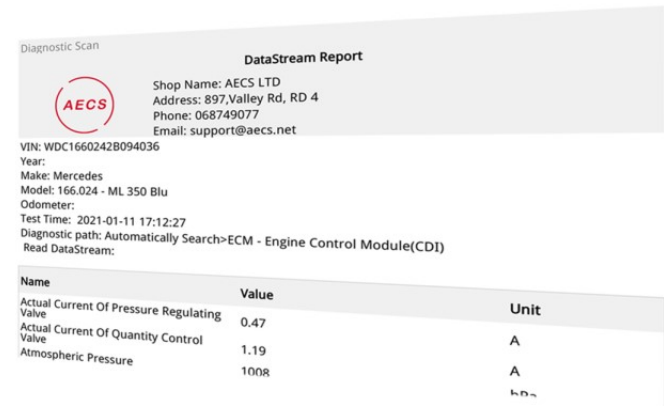

REPORTING

Generate, save and print full system scan (pre & post repair) and fault reports highlighting to your customer what the faults were before and after repair. Justify your invoice by attaching the generated professional looking report.

Technician Report

Live Data Report

UPDATING

The one-click update menu pre-selects the brands which have updated software available. Simply press the update button and the tool will download and install the updates automatically via WiFi. Quickly access the vehicle's ECU with one click.

RESETS

Access 15 commonly used software or manual reset procedures such as brake pad replacement, oil service resets, gearbox relearn, key coding, suspension learn, tyre pressure monitoring re-learn and many more.

If an automatic procedure isn't available the tool will guide you through the manual process.

BRANDS

Large tiles, display the brand software available in the tool including 138 brands. You can either start your diagnosis by manually selecting or automatically searching the vehicle that you have in your workshop. Alternative is automatic VIN scanning, which by-passes the vehicle selection process.

LIVE DATA RECORDING

Record, replay, save or post live data recordings directly from the tool. If the tool is connected to the internet you can post your live data recordings via email, messenger or upload them to the AECS support team.

ACTUATOR TEST

Activate various components with the option to monitor relevant live data lines. For example, control the VVT system and monitor camshaft phasing or activate the passenger window while monitoring motor position sensor.

SPECIAL FUNCTIONS

Direct access to manufacturers special functions with additional information available. For example, what operating conditions need to be met before a certain relearn or coding procedure can be started.

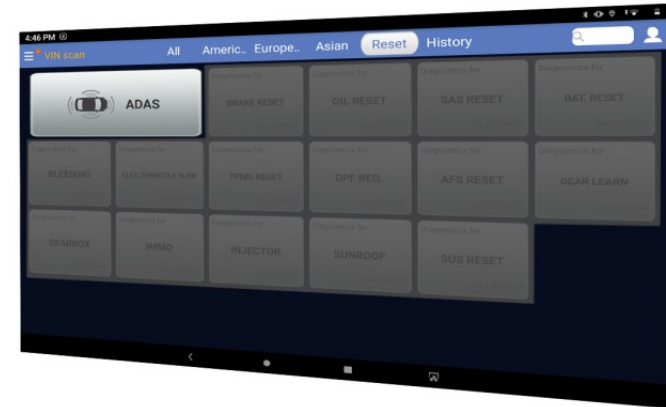

ADAS READY

Auscan 3 ADAS is ready for when you want to expand into ADAS calibration. AECS has all the ADAS equipment, knowledge, and training to get you started and upskill you and your team into vehicle safety systems.

QUICK ACCESS MENU (AFTER HEALTH CHECK)

Auscan 3 can communicate with other launch products all over the world. If you want to assist someone else or need assistance your tool is ready.

REMOTE DIAGNOSTICS

After an automatic health check, enter each ECU from the created list (for full access). At the top of the list are the ECU's with reported faults. Full access means fault codes read/erase, live data, actuator test, special functions and coding.

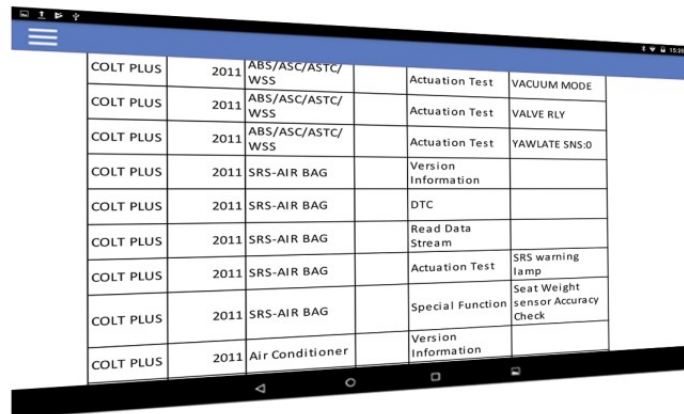

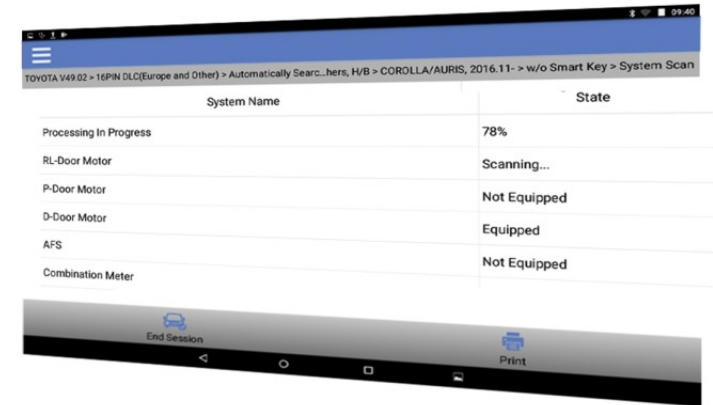

AUSCAN 3

SYSTEM SCAN | TOOL COVERAGE

AUTOMATIC HEALTH REPORT FULL SYSTEM SCAN

The scan tool can perform a full system scan picking out all available modules. Become an “all in one” workshop by being able to diagnose all modules on a vehicle. Don’t just limit yourself to an engine, transmission and ABS only tool.

TOOL COVERAGE

Easily access the tools coverage lists to see if the tool can do what you want to do before taking the job on. Yes the coverage list is accessible in the tool.

Get the right advice and insights for all your diagnostics tools and technical support. Start the conversation today.
