RUGGED & REFINED

CLASS TECHNOLOGY

12/24V | DOIP | CAN FD | SAE J2534-1 | RPI210 | USB |
BLUETOOTH 4.0 | WI-FI

Refined technology has paved the way to the new OBD Smart Box with the capability to be used between 12 and 24 volt vehicles².

Integrated technologies and unified protocols include accurate real-time data (CAN FD), vehicle module reprogramming in cars & commercial vehicles.

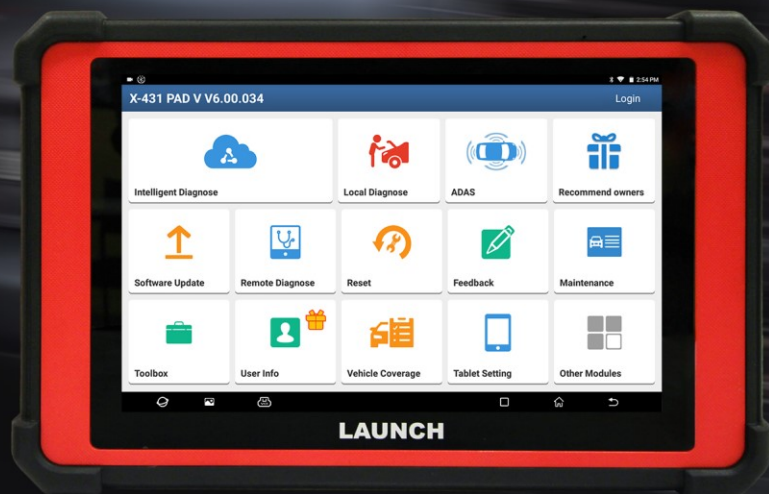

The new OBD Smart Box 3.0 integrates with not only Bluetooth, it will also communicate with PAD V over Wi-Fi for an unyielding connection minimising disconnect and data loss.

UNYIELDING

². In most situations this typically requires two different scan tools one for 12V and the other for 24V.
