## STOP LEAK DETECTION KIT

The Stop Leak Detection kit is made up of high quality automotive vehicle couplers, a refrigerant flow meter, flexi pipe, syringe and the all-important reusable stop leak detecting cartridges. (Testing takes less than 5mins).

### KIT CONTENTS

- A/C coupler
- Flow meter
- (10) Test cartridges\*
- R134A and R12 couplers
- Test hose
- Syringe
- Molded carrying case
- Detailed instructions
- Spare cartridges available

The dangers of the A/C Stop-Leak have become such an issue that a Stop-Leak detection kit has now been developed. This is a very real and growing problem.

Stop Leak coagulating after recovery. You will never know where your service apparatus obtained the Stop Leak or how many vehicles are infected with traces of Stop Leak. A/C service equipment becomes permanently damaged when infected.
